

***N*-Methyltrifluoroacetamide**

CAS No. 815-06-5

N-Methyltrifluoroacetamide is used as a building block in the synthesis of complex organic molecules which contain a trifluoromethyl group.

Specifications

Assay by Gas Chromatography 98 % minimum

Physical Properties

Chemical Formula: $\text{CF}_3\text{CONHCH}_3$
Mol. Wt.: 127.06
Boiling Pt.: 156-157 °C
Melting Pt.: 49-51 °C
Flash Pt.: 73 °C
Appearance: crystalline solid with beige color.

Packaging

Contact Customer Service

Typical chemistry and uses

It is used as an intermediate in the synthesis of pharmaceutical and agricultural chemicals.
